New North Texas Project

Anna Hurricane Creek WWTP

Engineer: **Kimley-Horn** (Fort Worth & McKinney)
Contractor: **Garney Construction** (McKinney)
Equipment: P.D. Blowers by **Aerzen**
Centrifuges by **Andritz Separation**
Slide Gates by **Hydro Gate**
Hyperbolic Mixers by **Invent**
Screw Conveyor & Level Lodor by **JDV**
PC Pumps by **Seepex**
UV Disinfection by **Veolia**
Polymer Feed System by **VeloDyne**
Fine Bubble Aeration by **Xylem/Sanitaire**

THE CITY OF Anna

PRODUCT FOCUS:

Grande Water Management Systems
ACU-TIP Tipping Bucket

The ACU-TIP tipping bucket system by **Grande Water Management Systems** is a sediment flushing system designed to remove sediment and debris deposited at the bottom of tanks such as stormwater retention tanks and equalization basins. The system works by releasing a torrent of fresh water stored in the tipping bucket resulting in a flushing wave that scours the bottom of the basin. There are minimal maintenance requirements and the system can be installed in new or existing basins. To learn more about the features and benefits of **Grande's** ACU-TIP tipping bucket systems, visit their website at www.grandeinc.com or contact your local Hartwell sales office.

AquaNereda® is Coming to Texas

The City of **Marble Falls** has elected to take advantage of the many features and benefits provided by the **AquaNereda®** aerobic granular sludge process offered by **Aqua-Aerobic Systems**. The **AquaNereda®** process produces robust granules composed entirely of biomass which efficiently carries out both nitrification and denitrification, while also biologically reducing phosphorus without the need for chemicals. With over 120 installations worldwide and over 20 in the U.S., **Aqua-Aerobic** is the industry leader in this technology. The **Marble Falls WWTP** project was designed by **Plummer Associates** (Austin) and the installing contractor will be **MGC Contractors** (Marion). Additional equipment on the project included P.D. blowers by **Aerzen**, chlorination equipment by **De Nora**, and rotary lobe pumps by **Swaby Lobeline**.

ELEVATE

ACE²⁵

AWWA ANNUAL
CONFERENCE & EXPO
JUNE 8-11, 2025
DENVER, CO

More than 15 of our manufacturers will be exhibiting the latest in equipment technology at the ACE25 Conference organized by the American Waterworks Association.

NEW TEAM MEMBERS

Heather Morrison has recently joined the Hartwell team as an **Administrative Assistant** in the Dallas office. Heather comes to us with a diverse background in office and project management as well as graphic design. We look forward to utilizing her skills in our advertising and social media efforts. Please join us in welcoming Heather to the Hartwell team!

Jenny Walker has recently joined the Hartwell team as an **Accounting Assistant** in the Houston office. Jenny comes to us with a strong background in project and financial management. Her proactive approach to her work and critical thinking are skills we look forward to utilizing. Please join us in welcoming Jenny to the Hartwell team!
